The Ghana College of Physicians and Surgeons has this month, November, 2007, officially moved into its new, spacious, ornate home at 54, Independence Avenue, near the Ridge Circle in Accra. It is expected that the new facilities that will be provided, over time at the premises, will make a significant contribution to postgraduate medical education in Ghana. The current Rector, Professor P. K. Nyame should be congratulated for his immense contribution to the planning and execution of this project. It is expected that His Excellency, Mr. J. A. Kufuor, the President of the Republic of Ghana, will formally open the new College premises.

Professor Silas Dodu, a very distinguished Foundation Fellow of the College and a former Dean of the University of Ghana Medical School, passed away on 29th June 2007. A short biography of Professor Dodu can be found in this issue of College News. May his soul rest in perfect peace.

With the exception of the faculty of Obstetrics and Gynaecology, all the faculties that had candidates who had satisfied the required conditions for the Membership Examination (Final Part 2) of the College, conducted the examination in October 2007. The faculty of Obstetrics and Gynaecology will conduct its Membership Examination early in January 2008. The results are published in this issue of College News. College News congratulates the successful candidates. The unsuccessful candidates are encouraged to work harder and to take the examination again.

New direct and indirect challenges face the College as it tries to plan for the immediate future. There are FOUR medical schools in the country at present. The intake into the TWO older medical schools (at Legon/K'Bu and KNUST/ Komfo Anokye) has continued to rise. The two newer schools (UDS/Tamale and CCMSI Cape Coast) will, in the next five years or so, add to the pool of potential residents for training at the postgraduate level. Part or all of this postgraduate training will take place in Ghana for the majority of these residents, after the initial obligatory internship period. There are important decisions to be taken by government, not just the Ministries of Health and Education, to ensure that the training programme or programmes are made relevant to the needs of the country and can be adequately supported financially. There will have to be regular reviews of any systems put in place to meet old and new challenges which include efficient use of training facilities, accommodation for residents, adequate remuneration for teachers, innovative use of hitherto unused medical facilities in regional and district hospitals after appropriate upgrading, supported by ICT/ distance learning techniques. The old ways are unlikely to solve the new problems.

New residents/ trainees will have to adjust rapidly to the demands of new programmes such as the new requirements for entry into the training programmes
for the different faculties. It is important for ALL residents to be aware of the fact that one of the major functions of the college is to organize the training programmes for ALL postgraduate students irrespective of what postgraduate diploma they intend to acquire at the end of the training period. The sponsorship for training and the training period for any faculty are determined by the Ministry of Health, in consultation with the College and its fellows. There are conditions attached to this sponsorship by The Ministry of Health. It is important that prospective residents satisfy themselves that they can abide by all the conditions stipulated for the sponsorship. These include registration with the College and penalties that follow if the contract is abrogated.

PROF. ALEXANDER BRUCE-TAGOE

4th Annual General & Scientific Meeting

The Fourth Annual General and Scientific Meeting (4th AGSM) of the College comes on from 28th to 30th November 2007 at the College Premises, 54 Independence Avenue, Accra. The theme of the meeting is “CHAMPIONING AFRICAN EXCELLENCE IN HEALTH.” There will be pre-conference sessions, workshops and meetings from 22nd November 2007. Professor Del Kahn, President of the College of Surgeons, Colleges of Medicine of South Africa (COMEDSA), will deliver the Guest Lecture. His topic will be “Liver Transplantation in Developing Countries”.

The first set of specialists from the College's programmes will be conferred with the "MEMBERSHIP" of the College.

Annual College Lecture

This year's Annual College Lecture will be delivered by Prof. Samuel Ofosu-Amaah, President of the Ghana College of Physicians and Surgeons. The topic for his lecture is "THE UNEXAMINED LIFE ISSUES IN THE HEALTH OF GHANA”.

Opening of College Premises

The new College Premises, located at 54, Independence Avenue, will be opened during the 4th AGSM. The four-storied College Premises includes provisions for an Auditorium, Museum, Restaurant, Gymnasium, Library, Bookshop, College Examination Rooms, Seminar Rooms, Simulation Laboratory, Telemedicine Room and a Clinical Demonstration Room. The premises also have a Fellows Lounge, Council Chamber, Board Room, Faculty Offices as well as administrative offices.

Award of Honorary Fellowships

Honorary Fellowships will be conferred on seven distinguished personalities during the AGSM on Wednesday, 28th November 2007. The recipients will be:

Professor S. O. Jeboda
Current President, National Postgraduate Medical College of Nigeria

Professor Zephne M. van der Spuy
President, Colleges of Medicine of South Africa

Prof. Lizo Mazwai
Past President, Colleges of Medicine of South Africa

Prof. Alex Kwapong
Former Chairman, Council of State, Ghana; former Vice-Chancellor, University of Ghana
CPD Courses

**Update on TB/HIV Co-infection: Management & Diagnosis**
The College, in collaboration with National Aids Control Programme and the National TB Programme, held a seminar on "Update on TB/HIV Co-infection: Management & Diagnosis" on 19th and 21st September, 2007 at the Erata Hotel in Accra and Miklin Hotel in Kumasi respectively.

The objectives of the workshop were:

- To review the clinical presentation and diagnosis of TB/HIV co-infection
- To give an update of TB diagnostics and the use of mycobacterial cultures
- To review current management of TB/HIV co-infections, and its complications
- To bring out and discuss issues on MDR TB and its management in Ghana

Thirty-three participants attended the workshop in Accra whilst thirty-nine attended the Kumasi programme. Topics discussed took the form of didactic lectures, case presentations and discussions, and included Clinical Aspects of TB/HIV Co-infection, TB Diagnosis, New TB Regime and STOP TB Strategy.

Management of Co-infection using Drugs, TB in Prisons and MDR TB, among others.

Facilitators were drawn from local expertise at the Department of Medicine, University of Ghana Medical School, the School of Medical Sciences, Kwame Nkrumah University of Science and Technology, the Noguchi Memorial Institute for Medical Research in addition to two infectious disease physicians and researchers from Brown University, Warren Alpert Medical School, U.S.A.

**Automation in the Clinical Laboratory (Clinical Chemistry & Haematology)**
The Faculty of Laboratory Medicine organised a Continuous Professional Development course on the theme "Automation in the Clinical Laboratory (Clinical Chemistry & Haematology)" on Thursday 30th August 2007 at the College Premises. Thirty-two (32) postgraduate residents, laboratory technicians and technologists attended the course. Topics discussed included The Automated Clinical Laboratory; Automation in Clinical Chemistry; Quality Control in the Automated Laboratory; Cell Morphology in Haematology; Automation in Haematology; Quality Control in Haematology and Coagulation; and Interpretation of Results in Haematology.

The facilitators were Prof. T. D. Osafo, Prof. A. A. Bruce-Tagoe, Prof. J. K. Acquaye, Prof. G. Ankra-Badu, Dr. Ivy Ekem and Dr. P. K. Buamah.

**Cancers of the GIT and Breast**
The Faculty of Surgery organised a workshop on “Cancers of the GIT and Breast” on Friday 3rd August 2007 at the College Premises. They discussed Cancers of the Stomach; Small Bowel Cancers; Cancers of the Large Bowel; Childhood Abdominal Cancers; Predisposing and Prognostic Factors in Cancers of the Breast; Investigating the Suspected Breast Cancer Patient; and Conservative Breast Surgery.
The workshop was facilitated by Prof. S. B. Naaeder, Prof. Rudolf Darko, Mrs. Afua Hesse, Mr. B. Baako, Mr. J. Clegg-Lamptey, Dr. E. P. Amaning and Dr. M. Ohene-Yeboah.

Revision Courses
Psychiatry Revision Course/Workshop
The Faculty of Psychiatry held a Revision Course/Workshop on 22nd, 23rd and 29th June 2007. The programme for the 22nd and 29th took place at the College Premises while that of the 23rd was held at the Accra Psychiatric Hospital. Sixteen (16) residents and fellows of the Faculty subscribed to the workshop. It featured topics like Anxiety Disorders, Mood (Affective) Disorders, Schizophrenic and Delusional Psychosis, Acute/Chronic Organic Brain Disorders, Forensic Psychiatry, Mental health Legislation in Ghana, Substance-Related Disorders and Psychiatric Emergencies, among others.

The facilitators were Prof. F. Y. A. Johnson, Dr Sammy Ohene, A Puklo-Dzadey Abbey, A. Osei, J. J. Lamptey. Chairpersons for the three days were Prof C.C. Adomakoh, Dr. J. B. Asare and Prof. S. N.A. Turkson, respectively.

September/October 2007 Part I, Final Part II (Membership) and Diploma examinations
The Part I, Part II (Membership) and Diploma examinations of the College were held from 27th September to 5th October 2007 at the Korle Bu Teaching Hospital in Accra. A total of 68 candidates registered to take the examinations. The distribution among the Faculties and summary of the results were:

2007 Residency and Diploma programmes start
The fourth batch of Residents was enrolled into the postgraduate programme on 1st October 2007. Out of two hundred and ten (210) applicants for admission, one hundred and seventy-five (175) were offered places. The following table shows the distribution of the new residents among the various Faculties and the two teaching hospitals in the country.

Board of Trustees for Endowment Fund Inaugurated

A twelve-member Board of Trustees, charged with the responsibility for running the Endowment Fund of the College, was inducted on Wednesday, 25th July 2007 at the College Secretariat. The Endowment Fund, which is yet to be inaugurated, would augment the resources of the College to further the professional and educational training of physicians and surgeons and promote specialist training in medicine, surgery and other related disciplines. It would also assist in the continuous professional development of students, promote research and formulate health policies.

Professor Paul Nyame, Rector of the College, disclosed that the College had enjoyed full support of government since its inception in 2002. He said, however, that the College needed to be more independent and more influential, raise its own funds and pay its own bills.

The President of the College, Professor Samuel Ofosu-Ammah, who inducted the Board of Trustees, said the quality of healthcare needed improvement. This, according to him, could only be achieved by upgrading the knowledge of doctors through the postgraduate courses offered locally. Prof. Ofosu-Amaah said it was the aim of the College to ensure that doctors who passed through the College were equipped with the necessary skills to fit anywhere they might find themselves and enjoy their work.

Mr. Ato Ampiah, chairman of the Board and Managing Director of Crystal Auto Company Ltd, said the time had come for Ghana to move away from donor funding to self-funding, and promised that the Board would do its best to ensure that Ghanaian doctors were given the needed skills locally.

The members of the Board of Trustees are:

- Mr. Ato Ampiah (Chairman) Crystal Auto Limited
- Mr. Edward Addo Unimax Macmillian Limited
- Prof. C. C. Adomakoh Treasurer, G.C.P.S.
- Mr. Osei Kwame Agyeman Casa Associati (Architects)
- Mr. Akenten Appiah-Menka Appiah-Menka Complex
- Alhaji Asoma Abu Banda Antrak Group of Companies
- Mr. Komla Afeke Dumor British Broadcasting Corporation
- Mr. Albert Essien Ecobank
- Prof. P. K. Nyame Rector, G.C.P.S.
- Mr. D.S. Quarcoopome 'Q' Farms Limited
- Mrs. Elizabeth J. Villars Camelot Gh. Ltd
- Dr. H. A. Wemah Agrovets Limited
- Nana Oye-Mansa Yeboaa Dompiahene of Akuapem

Excerpts of Special Articles

"Sports and Exercise Medicine (SEM) CAN IT BENEFIT GHANA?"

Dr. Anthony Annan MB ChB (Ghana), MSc (SEM) London, FFSEM (RCSI&RCPI) Dublin, MFSEM (UK) (RCSED) Edinburgh, DFFP (RCO&G) London

Sports and Exercise Medicine (SEM) is not a new concept or speciality; in fact it has been practiced in the USA for over 50 years and in other countries for many years now. These countries are reaping the benefits of SEM on its sports men and women on the world stage. SEM is currently not being practiced in Ghana. There is at present no SEM specialist base in Ghana nor indeed any continuing medical education or professional development for doctors working in sports. This therefore means that there is no SEM specialty in our medical institutions to help our elite athletes and the ordinary Ghanaians. SEM and current literature are currently a prerequisite for maximum performance of our athletes on the world stage. This is currently lacking in Ghana and hopefully will change in the future.

(The full version of this article will be published with the 4th AGSM proceedings and presentations on a Compact Disk (CD) obtainable from the College)

"Combating doctors' brain drain; the role of the Ghana College of Physicians and Surgeons"

This article by Dr. E. K. P. Kwarko, the elected representative of the Residents on the College Council, will be published in full together with the 4th AGSM proceedings and presentations on a Compact Disk (CD) obtainable from the College.
A brief biography of the late Professor Silas Rofino Amu Dodu

Professor Silas Rofino Amu Dodu was born in Christiansborg, in the then Gold Coast on Thursday 11th December 1924, the third child of the Very Reverend Edward Maxwell Dodu and his wife Margaret Lovering (nee Pinto).

When he was seven, his parents were asked whether they would send him as one of the first group of students to the new Achimota College. His father said he was too young to leave home so he started a year later and attended as a boarder from then until the completion of his secondary education at 18. Achimota College played a huge part in moulding Silas into the person of integrity, fair play, punctuality, and immense self-discipline that he was.

After teaching at Achimota for a short while, he was then sent with a group of other students in 1946 to Sheffield, England, to study medicine. Silas was awarded the Walter S. Kay prize for Psychiatry (University of Sheffield) in 1950 and graduated MB ChB (Sheffield), LRCP (London), MRS (England) in 1951 with a medal for the "Best Student" at the Final MB ChB in that year.

Immediately after his first medical degree, Professor Dodu went on to do postgraduate professional training, obtaining the member of the Royal College of Physicians of London (MRCP) qualification in 1953 and DTM&H (England). He was the first Sub-Saharan African to get the MRCP diploma and the first Ghanaian to become a Fellow of the Royal College of Physicians (FRCP).

On 5th September 1953, Silas married Joan (from Sheffield) at the Kensington Registry Office in London. They returned to Ghana, and during 1954-64 their four daughters Densua, Namua, Ofebea, and Odebea were born. On his return in 1953, Silas was appointed medical officer at Korle Bu Hospital and, later, as a physician specialist, ran specialist clinics (diabetes and hypertension) in internal medicine with Dr. J. A. Hawe. His work on diabetes, which was the biggest population study of diabetes in West Africa, indeed in Sub-Saharan Africa, earned him his MD degree with commendation from Sheffield University in 1957. Two years later he was elected a fellow of the Ghana Academy of Sciences.

He was the first Ghanaian of the Cardiac Investigative Unit that was established at Korle Bu Hospital in the 1960's. He led research projects on the community study of high blood pressure of public servants in Accra and Tema; and another in the community of Mamprobi which assumed international importance. The "Ministries" and "Mamprobi" became the Mecca for cardiovascular epidemiologists. Through his efforts and research Ghana now possesses hard facts about the havoc that high blood pressure is causing Ghanaians and its role in causing or being associated with heart attacks, heart failure and stroke, and chronic kidney disease.

As a physician specialist in Korle Bu, Professor Silas Dodu served for several periods as Hospital Medical Administrator between 1957 and 1965. He was a foundation member of the faculty of the Ghana Medical School, later to become the University of Ghana Medical School, and was the Inaugural Professor and Head of the Department of Medicine and Therapeutics (1965-77). He was the second Dean (1971-77) of the Ghana Medical School and was closely involved in the establishment of a postgraduate programme in Ghana. He also contributed to the setting up of the West African College of Physicians. Silas was a co-director of the Danfa Rural Health Project.

He was the foundation editor of the Ghana Medical Journal (1960-66), President of the Ghana Medical Association (1966-68), President of the Ghana Science Association (1961-62), President of the Association of Physicians of West Africa (1972-74), Vice-President of the West African College of Physicians (1977-78) and member of the WHO Advisory Panel on Cardiovascular Diseases (1975-85). He was invited to return to Sheffield University as a visiting professor in 1969 and was an honorary fellow of Churchill College, Cambridge, from 1971 to 1973. Silas's achievements were recognised by the nation and he was decorated as a Member of the Order of the Volta (MOV, Ghana) in 1979. He was a Foundation Fellow of the Ghana College of Physicians and Surgeons.

In 1977 Professor Dodu took up the post of West African Health Community Consultant in Liberia, establishing a postgraduate teaching programme. The following year he joined the World Health Organisation in Geneva, rising to become Chief of the Cardiovascular Department in 1983. He lived in Geneva with his wife Joan until 1985, when he retired.

Sadly, in June 1988 Mrs. Dodu passed away in Sheffield after a struggle with cancer, and Professor Dodu returned to Ghana where his mother, brother and family were living. He worked part-time at Nyaho Clinic for several years and continued to teach at the University of Ghana Medical School.
He was blessed to have the continued companionship of Auntie Iris Torto, who stood by him through thick and thin, and whom his children came to know and love. Without her, Silas's life would have been truly diminished.

In April 2005, Silas was presented with a LIFETIME ACHIEVEMENT AWARD by the Medical and Dental Council of Ghana, an award of which he was very proud. In their words:

"Professor Silas Rofino Amu Dodu, distinguished physician specialist, medical teacher, administrator, academician and humanitarian, for these and other achievements too numerous to mention, the Medical and Dental Council is honoured to present you this lifetime achievement award."

---

News in Brief

Notice of Change of College Phone Numbers
Please be advised that from January, 2005 the telephone numbers of the College will change as a result of a move to our new address at 54, Independence Avenue, Ridge, Accra. Details of our new phone and fax numbers will be available on our website at www.ghcps.org in December. The mobile phone number and email addresses remain the same.

Mobile phone number: 233·24-3690073
Email: ghcollege@4u.com.gh, info@ghcps.org

Faculty of Obstetrics & Gynaecology Part II (Membership) Examinations
The Part II (Membership) Examination of the Faculty of Obstetrics & Gynaecology of the College is scheduled as follows:

Written Examination
Date: Tuesday, 15th January 2008
Time: 9.00am
Venue: Medical School Examination Hall, O & G Department, Korle-Bu

Clinical and Oral Examinations
Date: Wednesday, 16th Thursday, 17th January 2008
Time: 9.00am
Venue: Obstetrics & Gynaecology Department, Maternity Block, Korle Bu

Congratulations
The Editorial Board of College News congratulates:

- Professor Fred Binka on his promotion from "Associate" to "Full" Professor of Epidemiology at the School of Public Health, University of Ghana.

- Professor Kobina Nkyerkyer on his promotion to "Associate" Professor in the University of Ghana Medical School (UGMS)

Fellows: keep us up to date
Keep us up to date with your correspondence address, telephone numbers and email address to help us stay in touch. Email fellowship@ghcps.org
